

# Danish solar energy

## CFR modules for building integration - Made in Denmark

### Why you should choose Us?

- Integrate roof and solar cells in one.
- Beautiful design
- Easy to install
- Save installation cost
- Save in metal structure cost
- Waterproof
- Made of solar glass, Glass can so resistance or even more than a tile.

### Facades solutions

- Can be integrated into the color facade with thin-film or crystalline modules in one.
- For facades renovation or new facades
- Colors and forms can be requested by customized design projects
- Architects will have the opportunity of free design
- This product can be used for a glass energy facade
